PROJECTS

Gps Tracking System For Ambulance In MSME Hackathon | September 2024 - October 2024

- The GPS Tracking System for Ambulances project aimed to create an efficient, real-time vehicle tracking and management solution tailored for emergency medical services. The goal was to optimize ambulance response times, improve coordination with hospitals, and enhance overall patient care by using digital tools and smart infrastructure.
This project was designed in response to challenges faced by MSMEs (Micro, Small & Medium Enterprises) in healthcare logistics, especially in managing fleets of ambulances with limited technological infrastructure.

Women Safety In Smart India Hackathon (SIH) | June 2024 - August 2024

- The Women Safety project presented in the Smart India Hackathon (SIH) aimed to develop a technological solution to enhance the safety and security of women in India using smart, innovative, and scalable digital tools. The idea was driven by the increasing concern over women's safety, especially in urban and semi-urban areas, and the need for a rapid, reliable, and integrated response system.

ACHIEVEMENTS

- Top 3 in class in B.Tech/B.E.
